

Double-Barrel Adapter

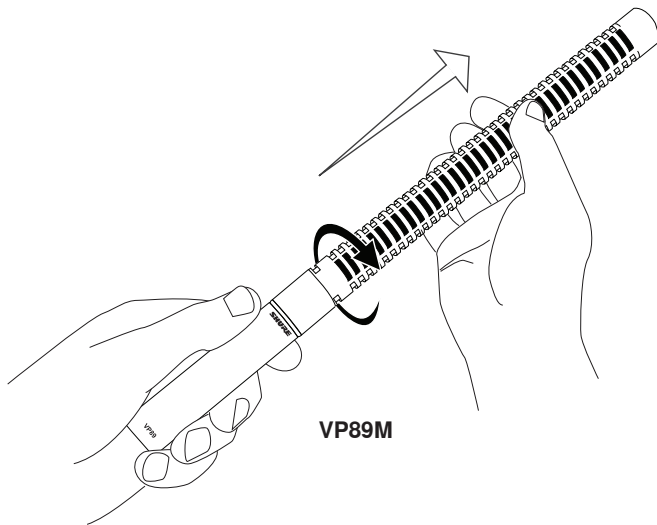

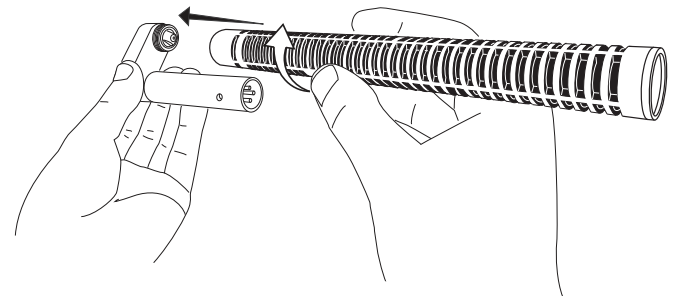

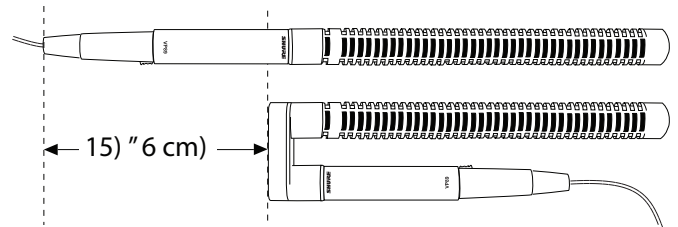

A89U

A89U Double-Barrel Adapter

The A89U adapter routes the VP89 preamp and cable connection beneath the capsule, shortening the length of the microphone by up to 6" (150 mm). Use the adapter to make a highly directional microphone in a compact form-factor.

Before each use, ensure the capsule and preamp are tightly secured to prevent signal loss during operation.

Certifications

This microphone accessory is CE compliant and operates only with CE compliant Shure microphones.
