General Description

The Shure Centraverse CVG is a professional gooseneck electret condenser microphone for use in general installed sound reinforcement applications. With dual gooseneck sections for full articulation, the CVG12/18 provides scalable, best-in-class performance in a wide variety of locations, including podiums and desktops.

Features

- Cardioid polar pattern with tailored response for speech
- Dual-section gooseneck enables ease of positioning and placement options
- Three model variations with inline preamps: standard, mute switch, and light ring indicator
- Available in 12” (30.4 cm) and 18” (45.7 cm) gooseneck lengths
- Commshield® technology guards against unwanted RF interference from portable wireless devices (smartphones, etc.)
- Included flange mount and snap-fit windscreen

Model Variations

Gooseneck Length

12: 12” gooseneck
18: 18” gooseneck

Mute Button and LED Indicator*

S: Includes mute button and bi-color LED on microphone body
RS: Includes mute button and On/Off colored indicator ring
*The Standard model does not feature a mute switch or LED

Color

B: Black

Polar Pattern

C: Cardioid

Note: Model availability depends on region. See your local Shure dealer or distributor for details.

Installation

1. Drill a 22 mm (7/8 in.) hole in the mounting surface for the flange and three additional holes for the screws.
2. Screw the flange into place, and then set the microphone into the center hole.
3. Connect the microphone to a mixer or P.A. system using an XLR cable.
   
   Note: This microphone requires +48V phantom power to operate.

Mute Button Operation

Press the button on the microphone body to turn the mute on/off. The standard model does not feature a mute button.

1. CVG12S: Mute is indicated by an LED on the microphone body:
   - Green = Microphone is on
   - Red = Microphone is muted

2. CVG12RS: Mute is indicated by a light ring on the microphone head:
   - Red = Microphone is on
   - Off = Microphone is muted
Guidelines For Use

1. Maintain a distance of approximately 15 - 30 cm (6 - 12 in.) between the sound source and the microphone.
2. Always use the supplied windscreen to control plosives and wind noise.

Specifications

Cartridge Type
Electret Condenser

Polar Pattern
Cardioid

Frequency Response
70 Hz to 16,000 Hz

Output Impedance
180 Ω

Sensitivity
open circuit voltage, at 1kHz, typical
-33 dBV/Pa[1](22 mV)

Maximum SPL[2]
1 kHz at 1% THD
120 dBSPL

Signal-to-Noise Ratio[3]
Ref. 94 dB SPL at 1kHz
67 dB
Dynamic Range
93 dB

Self Noise
equivalent SPL, A-weighted, typical
27 dBSPL

Preamplifier Output Clipping Level
at 1 kHz, at 1% THD
–7 dBV

Common Mode Rejection
10 Hz to 100 kHz
>45 dB

Polarity
Positive pressure on diaphragm produces positive voltage on pin 2 with respect to pin 3

0 1 2 3

---

0 [1] 1 Pa=94 dB SPL
1 [2] THD of microphone preamplifier when applied input signal level is equivalent to cartridge output at specified SPL
2 [3] S/N ratio is the difference between 94 dB SPL and equivalent SPL of self-noise, A-weighted
3 [4] All specifications measured with a 48 Vdc phantom power supply. The microphone operates at lower voltages, but with slightly decreased headroom and sensitivity.
