Printed in U.S.A.

CONNECTING EARPHONES

Following the manufacturer's instructions, connect your earphones.

WEARING THE EARPHONES

Wear the earphones as illustrated below.
When answering calls speak in a normal manner

Over the ear
in front

INSERTING THE EARPHONES

If the earphone seems to be lacking in low frequency response (bass), check the tightness of the seal between the earphone and your ear, or try one of the other sleeve options.

Warning: Do not push the earphone sleeve beyond the ear canal opening.

Make sure that the sleeve completely covers the earphone stem. If any part of the nozzle is exposed, the sleeve is not properly installed.

WAX GUARD

You should place wax guards on the nozzle of your I2c-M earphones before using them. These protective rings are found on an adhesive strip in the fit kit that comes with your earphones.

To place a wax guard on one of your I2c-M earphones:

1. Remove the sleeve from the earphone nozzle.
2. If there is a dirty wax guard on the earphone, peel it off.
3. Clean the tip of the I2c-M nozzle with an antiseptic or alcohol wipe.
4. Make sure that the tip of the nozzle is dry, then remove a wax guard from the supplied strip and place it on the tip of the nozzle, adhesive side down.
5. Replace the sleeve on the earphone.

IMPORTANT: Do not place wax guards on sleeves! Wax guards are intended for use on the tip of the earphone nozzle only. If wax guards are placed on sleeves they will not function properly and may fall off the sleeves into your ears.

CHOOSING AN EARPHONE SLEEVE

Your earphones come with sleeves in three sizes. Make sure the sleeve you use is easy to insert into your ear, fits comfortably, and is easy to remove from your ear.

Soft Flex Sleeves

In small, medium, and large sizes.
Made from pliable rubber

MAINTENANCE

Careful maintenance ensures a tight seal between the sleeve and nozzle, improving sound quality and product safety.

Keep the earphones and sleeves as clean and dry as possible.

Do not expose earphones to extreme temperatures.

Wipe the earphones and sleeves with mild antiseptic to avoid infections. **Do not use alcohol-based disinfectants.**

TECHNICAL SPECIFICATIONS

Transducer type	Dynamic
Sensitivity (at 1kHz)	105 dB SPL/mW
Impedance (at 1kHz)	16 Ω
Output connector	3.5mm 4 pin jack

CERTIFICATION

Eligible to bear CE marking.

Conforms to European EMC Directive 89/336/EEC.

Meets applicable tests and performance criteria in European Standard EN 55103 (1996) Parts 1 and 2, for residential (E1) and light industrial (E2) environments.
