**Price**

$27.00 each

**Price for 25 or more**

$24.00 each

**Price for 100 or more**

$22.00 each

**Removal ofthe Ground Tab**

Blunt a work tool, such as a small screwdriver, against the ground tab, and gently pull forward out of the housing. The tab is removed from the right channel ground (usually green) and the left channel ground (usually blue). This will break the ground loop hum, revising the cartridge directly to the ground. If the tab is removed and returned to its original position, the cartridge wiring is connected to the cartridge shell, resulting in a hum through the cartridge.
