SCL5
Sound Isolating Earphones

The SCL5 combines Dual Live Performance Drivers with an Inline Crossover to create the same reference-quality audio developed for professional musicians. The result of dedicated speakers for highs and lows is the faithful reproduction of precision highs, natural mids, and full-bodied bass.

WEARING THE EARPHONES
Two popular methods for wearing the earphones are illustrated below.

INSERTING THE EARPHONES
If the earphone seems to be lacking in low frequency response (bass), check the tightness of the seal between the earphone and your ear, or try one of the other sleeve options.

Warning: Do not push the earphone sleeve beyond the ear canal opening.

CHOOSING AN EARPHONE SLEEVE
Your earphones come with a selection of sleeves. Make sure the sleeve you use is easy to insert into your ear, fits comfortably, and is easy to remove from your ear.

Yellow and Black Foam Sleeves
When using the foam sleeves, compress the sleeve between your fingers before inserting it into the ear canal. Hold the earphone in place for about ten seconds while the foam expands and creates a tight seal. Black foams come in small, medium and large sizes.

Soft Flex Sleeves
In small, medium, and large sizes. Made from pliable rubber.

Yellow and Black Foam Sleeves
When using the foam sleeves, compress the sleeve between your fingers before inserting it into the ear canal. Hold the earphone in place for about ten seconds while the foam expands and creates a tight seal. Black foams come in small, medium and large sizes.

Triple-Flange Sleeves
If desired, the sleeve nozzle may be shortened. Use sharp scissors to carefully trim the nozzle to the desired length.

CLEANING THE EARPHONE NOZZLE
If the nozzle of your earphone is blocked, clean the nozzle using the supplied wax removal loop.

Warning: The wax removal loop is only to be used to clean earphones. Any other use, such as using the tool to clean ears, could result in injury.

Over the ear in back
Over the ear in front

Tighten the cable and take up slack by raising the cable sleeve 1.

left ear
right ear

Make sure that the sleeve completely covers the earphone nozzle. If any part of the nozzle is exposed, the sleeve is not properly installed.

MAINTENANCE

Careful maintenance ensures a tight seal between the sleeve and nozzle, improving sound quality and product safety.

- Keep the earphones and sleeves as clean and dry as possible.
- To clean sleeves, remove them from earphones, gently rinse in warm water and air dry. Foam sleeves require a longer drying time. Inspect for damage and replace if necessary. Ear sleeves must be completely dry before reusing.
- Wipe the earphones and sleeves with mild antiseptic to avoid infections. Do not use alcohol-based disinfectants.
- Do not expose earphones to extreme temperatures.
- Replace the sleeves if they do not fit properly.
- Do not attempt to modify this product. Doing so will void the warranty and could result in personal injury and/or product failure.

FURNISHED ACCESSORIES

- Premium Carrying Case
- Fit Kit: contains soft foam, soft flex and triple flange sleeves plus cleaning tool
- Stereo Adapter Plug - 1/4 in. (6.5mm) to 1/8 in. (3.5mm)

CUSTOM EARPHONE SLEEVES

For information about earphone accessories (listed below) and other Shure products visit: www.shure.com

- Replacement Sleeves
- Extension Cable
- Carrying Case
- Push To Hear (PTH Module)
- Adapters
- Volume Control

ACCESSORIES

CERTIFICATION

Eligible to bear CE marking.
Conforms to European EMC Directive 89/336/EEC.
Meets applicable tests and performance criteria in European Standard EN 55103 (1996) Parts 1 and 2, for residential (E1) and light industrial (E2) environments.
