Combining Hi-Definition MicroSpeakers and a stylish sound isolating design to deliver full range audio free from background noise, the Shure SE210 is an ideal portable listening device upgrade. An included modular cable and interchangeable Sound Isolating™ sleeves provide a comfortable, personalized fit. The carrying case further enhances the portability of these lightweight earphones.

Three suggested methods for wearing the earphones are illustrated below.

To replace sleeve, carefully remove old one and slide new sleeve over nozzle barb. If any part of the nozzle is exposed, sleeve is not properly installed.

Replacing sleeves if they do not grip the nozzle tightly

Tighten the cable and take up slack by raising the cable sleeve.

Over the ear in back

Over the ear in front

Straight down in front

Soft Foam Sleeves
When using the foam sleeves, compress the sleeve between your fingers before inserting it into the ear canal. Hold the earphone in place for about ten seconds while the foam expands and creates a tight seal.

Soft Flex Sleeves
In small, medium, and large sizes. Made from pliable rubber.

Warning: Do not push the earphone sleeve beyond the ear canal opening.

Soft Foam Sleeves
If desired, the sleeve stem may be shortened. Use sharp scissors to carefully trim the stem to the desired length.

Choosing an Earphone Sleeve

Your earphones come with a selection of sleeves. Make sure the sleeve you choose is easy to insert into your ear, fits comfortably, and is easy to remove from your ear.

Note: Do not pull on cable to remove earphone.

Cleaning the Earphone Nozzle

If the earphone seems to be lacking in low frequency response (bass), check the tightness of the seal between the earphone and your ear, or try one of the other sleeve options.

When cleaning, do not force any object through the earphone nozzle! This will damage the earphone sound filter.

If you notice a change in sound quality, remove the sleeve and check the nozzle of your earphone. If nozzle is blocked, clear obstruction by using wire loop end of cleaning tool.

Note: carefully slide sleeve over earphone nozzle barb for a secure grip.
Furnished Accessories

- Deluxe Carrying Case
- Fit Kit: contains soft foam, soft flex, and triple flange sleeves plus cleaning tool
- Stereo Extension Cable - 3 ft. (91 cm)

Maintenance

Careful maintenance ensures a tight seal between the sleeve and nozzle, improving sound quality and product safety.

- Keep the earphones and sleeves as clean and dry as possible.
- To clean sleeves, remove them from earphones, gently rinse in warm water and air dry. Foam sleeves require a longer drying time. Inspect for damage and replace if necessary. Ear sleeves must be completely dry before reusing.
- Wipe the earphones and sleeves with mild antiseptic to avoid infections. Do not use alcohol-based disinfectants.
- Do not expose earphones to extreme temperatures.
- Replace the sleeves if they do not fit properly.

Certification

Eligible to bear CE marking. Conforms to European EMC Directive 89/336/EEC.

Meets applicable tests and performance criteria in European Standard EN 55103 (1996) Parts 1 and 2, for residential (E1) and light industrial (E2) environments.
