

WA653 Microphone Flag Extender

The Shure WA653 Microphone Flag Extender extends the length of Axient and UHF-R wireless handheld transmitters to fit various microphone flags (not included). Customize transmitter length with an extender to fit your microphone flag. Package includes two different lengths:

- 1 inch microphone flag extender
- 1.5 inch microphone flag extender

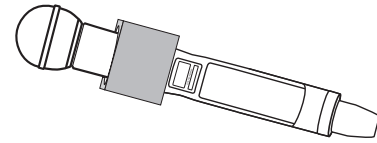

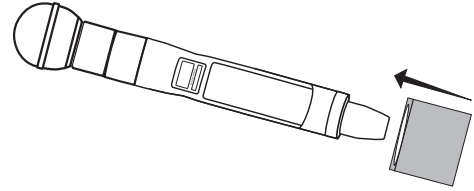

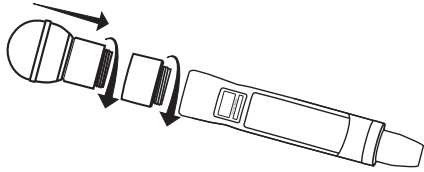

Installation

1. Remove protective ring from top of extender.
2. Thread microphone cartridge into extender.
3. Thread extender into microphone body.

Note: Only extend transmitter maximum of 2.5 inches. Extending more than 2.5 inches can damage transmitter if dropped.

4. Insert microphone flag from bottom of microphone body.

Warning: Do not insert microphone flag over the cartridge side of the extender. This may damage electrical connections in the extender.

Specifications

Dimensions	1 inch extender	31.8 x 37.1 mm (1.25 x 1.5 in) (L x Dia.)
